

Chaffhaye Testimonial

April 10, 2009

Willa Adkins
Tularosa, NM

Since I have started my horses on Chaffhaye, they seem to have more energy, and have stopped coughing due to wind and dust. They do not seem to be as hungry or demanding of their food at feed time. They are calmer and generally seem to feel better, including my 18 year old romping and playing in the middle of the night with my 6 year old mare.

I am sold on this type of feed. The wet moist feed is desirable for me too as I am not breathing in the dust and mold given off from dry alfalfa. Chaffhaye is easier for me to store and handle as it is in bags and takes much less room. It also stays moist even after the bag is opened for a couple of days.

It is cost effective too. It seems to not to take as much to feed due to the complete nutrients, that is (otherwise) lost in dry alfalfa.

An added benefit is fewer poops to have to pick up.

Thanks Chaffhaye!
